SUMMARY

Full stack Designer with 4.9 years experience and an undying appetite for effortless experiences and designing for products, websites and mobile applications and love anything that involves the creative process from concept through execution. I love exploring new methods to manifest my ideas from photography to illustration. Primary objectives are to continue to explore, develop and enjoy the challenge of design and to expand my creative capacity.

Primary Skills:

- Assess and optimize the effectiveness of new and existing features by actively participating in usability testing and user research, and interpreting analytical data.
- Collaborating on project briefs and writing job stories.
- Create flows, wireframes, prototypes, and design mockups as needed to effectively conceptualize and communicate detailed interaction behaviors.
- Help refine the architecture, user interface, product features, and end-to-end experience for new features/functionality.

Strengths: Strategic, Futuristic, Achiever, Learner, Vast software skills
